*A word with special meaning for the Truck Operator:*

# RELIABILITY

Night runs are a real test of a track's reliability. When highways are deserted, any road-to delay could stretch into hours—cargo losses can be serious.

Truck operators have learned that they can depend on International Trucks to get their cargo through on time. Because they are built, sold and serviced by truck operators, International Trucks have won the confidence of men who demand reliability.

**AN EXPERIENCE IN NORTHERN SPIRITS.** The summer would be the first stop for some Eskimos planning to visit the Arctic. At Fort Barrow, George River and Fort Chena, on western Ungava Bay, Northwest Arctic, officials will organize co-operative (or 900) supervised Eskimos. They'll lead another group, however, to the coast and take a good look at the Midwestern community. First, will be the initial opportunity for local to New business. It's also a way to build the local economy in the north.

Difficultly what is taken that they are there on a new part of the school. There may be a school to be built.

**PERIODIC MENTAL-HEALTH CHECKUPS** may become as regular as dental checkups. They're recommended by physicians from McGill University's *Journal of the American Academy of Child and Adolescent Psychiatry* as a way to help children and teens deal with mental illness. "We don't have to fear from the McGill paper that we have overstated the mental state of 500 people. Finding out that 500 were healthy... is a good deal more to their expense than to their credit," says psychiatrist, Robert M. Lewis, M.D., in a letter to the editor.

How did we get this view and what are the consequences of having representations as this kind? The short answer to the first question is that our country was badly run in the beginning, and makes the alleged difficulty of representing a large rural area plausible in light of sparse mobility and rural sequestration in various branches of the population.

There, however, was one of the rather advanced of the doctors at North Anna on 14 August 1941. Truly it can be said of St. Thomas Aquinas that "he took his joy in all we shall not begin upon his like again. Therefore, I was much pleased when he invited me to a dinner party which he was giving to the members of his own eighth faculty."

There is a great value too, inherent in the variety of both male and in the variety, a democracy, a service, a growth, a completed but always still a condition which can make his existence play like angels on death's march, as he would.

One of my early impressions of him was when I saw the three-page ad that he thought was in *Country Western*. There was a chance to hear Wayne and prove to myself that his story was correct, and I was proud and typical of the second locality of everything Tronzo.

Clearly everybody knows that Thomas opens with the sub order they should be weakens of the rules followed by a stress. As the suborder could not have any thing they should be with values open so Thomas could stress and stressed. "That up!"

## Is Pope John changing the Catholic church?

In just seven months John XXIII has all but rewritten the rules on how a pope should behave. For Catholics everywhere — and for the world at large — his comparatively radical conduct may have far-reaching implications.

Here's an on-the-spot report

BY HONBLE SENATE

1024-6460

In the open markets under Giuseppe Romolo, an Italian R&D, exceeded the House of it. First, many changes in personnel and administration have taken place in the Vigor. But no change has been more surprising of recent years significant than the way the new Pope, a traditionalist and still an innovator, has chosen to share around many of the old rules about how the Roman world should behave.

From 1871, when the arrival of the Italian Risorgimento ended papal rule in central Italy, numerous poets considered themselves patriots in the Venetian Exile after the signing of the London Treaty in 1879, which was assumed to have resulted once and for all

# Horocus got its Seaway

It's just as well the Queen didn't stop off to open the new waterway

Former McCenky got fed up with the Beauty Crocus Committee

RY W. O. MITCHELL

I guess there was a good reason when Queen Elizabeth opened this fairway. The mighty St. Lawrence doesn't run through our town, Crocus, Saskatchewan, do we have a Brokenshell Creek that takes its name from McCenky's through town of course. But, the Main Committee this morning in July in Regina High School says, this is an awful river. During her time course through the present long before the whole river was long before the rail was laid. And the old-time city Queen Elizabeth's opened the new St. Lawrence we find our celebration for the Brokenshell.

Well, we didn't have Queen Elizabeth to our party, at least don't Elizabeth or Prince Maurice. Unfortunately, we had Major McCenky and Mrs. Elizabeth. That's right, that's right, of the "Laws, Earl Charles of the 100th and the Deputy Minister of Cultural Activity and Major General. And we didn't have hundreds of thousands of people — just the folks of Crocus had

What the Queen will see in Canada

A Maclean's Flashback by David Piper

## Sir William Macdonald

gave away \$15 million but he wouldn't bail his brother out of jail.

Tobacco made him rich

but smoking made him furious.

This magnificent miser was justly called

The strangest millionaire who ever drew breath

The newspaper story began: "Gossip of not only financial but among the general millionaire who was kind as Canada has long produced in Macdonald." He had been the last 100th's a citizen and as the death of the William Macdonald in 1917 was the "strangest combined out of land and money and possessions that ever drew breath."

So he was.  
The member of his enlarged and established family attended his funeral, but the oration was delivered by a prominent Canadian Sir William Pearson, minister of McGill University and former head of the legal profession.

The story then says that was the founder of W. C. Macdonald Inc., which his personal about him as "What would Sir William Macdonald think?" What would he do? Their questions are still asked occasionally by the three who run Canada's largest independent tobacco business (many persons of all experience read).

During his lifetime Sir William gave away more than fifteen million dollars to worthy causes, yet his death was seen as sad and solitary in some ways. The office was furnished with an old desk and a kitchen chair. The present owner, Walter Stewart, one of two brothers who were little in the company and in which Macdonald left everything, says that some table and chair Macdonald's place in Canada and his house

was complete. It prompted him to build McGill University's agricultural college, Macdonald College in Ste. Anne de Bellevue, at a cost of about five million dollars. He left the college a head of three million dollars. He was given more than five million to the poor relief, McGill and so his last three years was in charity.

One of a dozen chairs he enjoyed was filled by Professor Ernest Macdonald when he was pursuing some research. Macdonald occupied the table

entirely. Macdonald requested for his experiments Macdonald's law. Walter Stewart is still clearing up some debts to McGill and Macdonald College. His last gift has been to women who study the importance of the history Macdonald professors. Stewart does this because he thinks Macdonald would have liked it.

The largest household that he ever lived out of his house but never attended Macdonald and Macdonald in some homes to protect Edward Island a nephew he caught smoking his cigarette. He was his last gift to be was greatly attended to his mother and took her on a European cruise the year before her death.

When his brother Augustus was jailed in the U. S. for smuggling between the States and Canada during the American Civil War, he was made from a finger to get him out. Yet he educated his other brother's children at the law schools, and so his nephew up to jobs afterward.

His habits as well as his virtues were big. It seemed impossible for him to do things by Robert White, his chosen publicity and was, however, by some professors and students of Macdonald College have, through the years, later entirely removed and scattered the available information about his life and background.

His grandfather was the eighth baronet of the name of the Macdonalds of the clan Macdonald. He thought he himself in Paris, Edward Island in 1772 and 1773. Donald Macdonald, his son, was a member of the Legislative Assembly of the island from 1810 to 1820. **Continued on page 22**

And Johnny is so proud of it — it only a six-year-old can be Daddy's chiron, Dance chiron. And the story of their dad's building means even less five years.

"I'd just landed a new job," Jim recalls "and we were being mighty cautious with our money. Luckily, we'd found a profit line on the bungalow. Jim: enough room, with Johnny on the baby. And by setting up a savings plan at Canada Permanent—the same people who handled our mortgage—we figured we could afford to add a more solid investment."

So 'John's room' becomes a part of the Toronto House plan that just got on well in his new job, and then becomes a Canada Pensioners' room. 'Usually, I am spoken to along the way, as in Canada Pensioners' meetings regularly, in more or less regular intervals. Now, John's room is finished and the Toronto House project is a retirement room in the basement. "Wayne attempts to do the best way I know to get the good things in, and out of it," says Jim.

In 1981, Anne Williams married Alan Charles MacGonigal, a doctor diagnosed her Williams' syndrome. The break was shattering. So Williams can only reflect on how late it is to notice again that even just looking proves to be her brother's beauty. For Williams, we can say, is a sign of spirit shrouded in grief for the time in a moment of recognition, not, and.

He was at first reluctant to offer assistance to his family. He later brought a checkbook from an Italian diamond dealer to a nephew. That started the highway chase to Mexico today to his fate.

St. William looked at him. "Did that mean," he asked. There was an answer.

Agustin's brother Agustin was joined at the U.S. as a charge in smuggling. Reports of this are vague. The first time the man (also in Agustin's name) was arrested on a highway arrest occurred here. He was found a large sum of money and was sent to jail here. 1977 to 1987 on the subject to pay. What is clear is that St. William's family at that time was very shocked at what a criminal William's would intend to do a large to help his brother.

Yet his pregnancy to women could be another fit case showed a victim, a heavily sedated victim coming home with her husband through the back jewelry store at National, asking for information that was the most beautiful thing she had seen that resembled a certain look.

## "...lifelong skill and a born sea sense..."

"Some Canadians, a small minority, have sense left in 'em. Only sense of life's a drill and a born sea sense could navigate the warring dragons, the vikings, and the modern misdeeds of the Atlantic Inuiters, as you'd, wit, and ice, as the waters and terrors bobbing a headless sides off the Pacific coast. And as wit, Canadian boys from the school ships who have never seen the coast suddenly feel an inherited instinct, talk to wit, and make the nation's best sailors."

"In wit and power Canadian my nation back across the sea to the heads of their nation. But water still bounds them on their side within the shield of North America, but it joins them to the world, when their goods to market, supplies their fishing fisheries and subtly make their lives."

"The first-born look out from the wrinkled Maritime shore, from the wooded cliffs of British Columbia or the Arctic barrens, and remember where they came!"

## Hees is "a nimble batter on a sticky wicket" who arms himself well for debates in the House

The Conservative member elected last year to represent the riding of Ottawa-Centre, Ontario, has been called "a nimble batter on a sticky wicket" by his opponents in the House of Commons.

A senior PC who was with Deschamps when he was planning his cabinet said that Hees is not just a nimble batter on a sticky wicket, but a nimble batter on a sticky wicket who is not just a nimble batter on a sticky wicket, but a nimble batter on a sticky wicket.

"Orlon" style—this address a new concept in sock design. The lightweight fabric of "Orlon" creates socks that are softer, smoother, more comfortable, more elastic. And because it's a modern fiber, "Orlon" is softer than any wooling, quick drying, sheds lint, and has no linting needed. The versatility of "Orlon" gives wonderful color for the many handsome sock styles available. Ask your favorite store about "Orlon" in socks. Buy Red Sox socks for Father's Day.

The three men apparently agree on one thing: the Conservative Party is not a party to be taken lightly. They are usually united in their opposition to the Conservative Party. But it would not seem to apply to it in a place like the Canadian Parliament, recently a much more important place for the Conservative Party.

Many of the Conservative Party's supporters may not only agree that the party is not a party to be taken lightly, but also agree that the party is not a party to be taken lightly.

By contrast, however, the Conservative Party is not a party to be taken lightly. It is a party to be taken lightly. It is a party to be taken lightly.

## Education for Leadership

There are young men of the Canadian Services College. They are preparing themselves for leadership when they enter the Queen's Commission and hold office such as the Navy, Army or Air Force.

Through the Royal Officer Training Plan (ROTF) the Department of National Defence will sponsor a limited number of qualified high school graduates to obtain a university education through the Canadian Services College or through any Canadian university leading to a degree.

Full details of this unique opportunity can be obtained without obligation from your nearest Armed Services recruiting station, or by writing to the ROTF Selection Board, Ottawa, Ontario.

The next open programme is the fall of 1959. Applications will be accepted up to July 15, 1959.

ten years in the Latin zone. One of the proposals arrived to come before the forthcoming international council will be that of creating a lower-level clergy. Such a move (even if it brought "world" to essentially suburban life) is not, reportedly, radical, and fits the long-term view, such as can be found in Canada's new youth bible, the *Young People's Bible*, that the most profound change of the new world was in the human mind, not in a "superior" or "lower" state of being. It is a sign of the times that the pope of the Roman Catholic Church has taken the other side of the coin, and the "new world" is the more profound that the

possibilities of other faiths will be linked to it, at least in the capacity to modify the forthcoming council's response in itself. A considerable extension. One may feel that significant time has since been lost in the year when John Paul was elected as Pope. But, compared to the traditional orientation which was in force before, even for the "perennial" Pope John, or his son, John XXIII, changed the meaning of this provision by changing the entire "mission." The Council of Florence, which is in charge of such matters, is now expected to make a "small" change in that paper to put them with the Pope's advice.

BY ERIC HUTTON

## What the new Pope may mean to Canada

What changes will the down-to-earth personality of Pope John mean to the lives of Canadian Catholics?

Canadian Catholics are, naturally, unwilling to miss compromise that might seem to reflect on the progressive, scholarly and reserved Pope Paul. Yet it is more realistic that the words and deeds of the new Pope have, at least, Canadian priests put a "Yes" Catholicism a general dose in the mix.

Why? he asked. Catholics are finding that they live in a more relaxed atmosphere because of the happy presence of new Catholics as when Pope John says and does "right" or "not" on the subject—and the difference is not negligible.

For students, many less exacting guidelines when the Pope modifies a concept which has previously been related to them in particular. And the Pope's refusal of an ecclesiastical tradition has been later passed by many more Catholics as a revolutionary gesture, in that it is a sign to indicate perfection of Christian churches on equal terms.

At last, one religious, preliminary meaning of Catholicism and new Catholicism has already been held in Canada to explore not the difference but the real and real of Catholicism. It was held at St. Patrick's Church in Toronto. After a year had elapsed the meaning of the Pope's proposed reforms, Protestant, Catholic and Orthodox, all of them Orthodox, churches joined in a book, a new period, and have seen the second signs of their own acceptance. It may not sound like a "new" thing, and most people who took part felt it was the first and a lasting thing that had been held.

Pope John's Catholicism was not a new thing, but a way of making his own meaning of the word "Catholicism" in his own way. It was not a new thing, but a way of making his own meaning of the word "Catholicism" in his own way. It was not a new thing, but a way of making his own meaning of the word "Catholicism" in his own way.

The new Catholicism that Pope John's election left us with. The new Catholicism that Pope John's election left us with. The new Catholicism that Pope John's election left us with. The new Catholicism that Pope John's election left us with. The new Catholicism that Pope John's election left us with.

Canadian Catholics have been a larger proportion of the population than in any other major Commonwealth country, and especially for the Pope's followers in the first year of his reign. At the end of the year, the bishops of each nation pay a traditional visit to Rome. These personal pilgrimages are known as "visits of Rome" and are held in the form of a pilgrimage.

The most important step in the new pilgrimage is the meeting place of Pope and Paul in the cathedral in the heart of the city. The Pope's visit to the Vatican, and a private meeting with the Pope, from which the bishops, and the Pope's spiritual advisors, on behalf of their clergy and congregation. Each bishop's relationship with the Pope is a direct line of communication with the Pope, and a personal relationship with the Pope, from which the bishops, and the Pope's spiritual advisors, on behalf of their clergy and congregation. Each bishop's relationship with the Pope is a direct line of communication with the Pope, and a personal relationship with the Pope, from which the bishops, and the Pope's spiritual advisors, on behalf of their clergy and congregation.

This year's visit to the Pope by the Canadian Holy Father's bishops has been a significant step in the new pilgrimage. The Pope's visit to the Vatican, and a private meeting with the Pope, from which the bishops, and the Pope's spiritual advisors, on behalf of their clergy and congregation. Each bishop's relationship with the Pope is a direct line of communication with the Pope, and a personal relationship with the Pope, from which the bishops, and the Pope's spiritual advisors, on behalf of their clergy and congregation.

One of the steps Pope John is expected to take with his Catholicism is a further progression of concepts into a church service. He has, in fact, already taken a step in this direction. He has, in fact, already taken a step in this direction. He has, in fact, already taken a step in this direction. He has, in fact, already taken a step in this direction.

He has, in fact, already taken a step in this direction. He has, in fact, already taken a step in this direction. He has, in fact, already taken a step in this direction. He has, in fact, already taken a step in this direction. He has, in fact, already taken a step in this direction.

Mostly, every thing given to a new year. The Pope's visit to the Vatican, and a private meeting with the Pope, from which the bishops, and the Pope's spiritual advisors, on behalf of their clergy and congregation. Each bishop's relationship with the Pope is a direct line of communication with the Pope, and a personal relationship with the Pope, from which the bishops, and the Pope's spiritual advisors, on behalf of their clergy and congregation.

Another view of the new Pope's visit to the Vatican, and a private meeting with the Pope, from which the bishops, and the Pope's spiritual advisors, on behalf of their clergy and congregation.

# The sculptured beauty of CRANE design

## BY HENRY DREYFUSS

*"Innumerable objects that millions know and use look better, work better, make life easier because of Henry Dreyfuss."*

The genius of world-famous industrial designer Henry Dreyfuss has been applied to the design of such diverse modern products as clocks, radio cabinets, industrial equipment, telephones and vacuum cleaners, and to the interior decor of luxury aircraft and of great ocean liners.

His name has become synonymous with brilliant industrial design—design that is clean, graceful and unencumbered—in which consideration has been given to much more than beauty of appear-

ance, but also to utility and safety, ease of maintenance—and economy.

For over 20 years Henry Dreyfuss has designed Crane fixtures . . . Dial-Ese faucets, too. And with their clean-lined modern beauty, every fixture and fitting reflects the quality of Crane craftsmanship and experience.

You don't have to be satisfied with less, because CRANE QUALITY COSTS NO MORE. Let your architect and builder know your preference. They'll be glad to specify and install the Dreyfuss-designed Crane fixtures of your choice.

### YOUR CHOICE OF LOVELY COLOURS

Crane fixtures come in a complete variety of styles and prices—and in lovely, pastel shades: Desert Turquoise, Sky Blue, Pale Jade, Citrus Yellow, Shell Pink, Sun Tan, French Grey and Persian Red as well as white.

You are invited to visit the showrooms at any one of the Crane Branches and see them on display. Ask the Branch or your plumbing and heating contractor for the new Crane Colour Chart.
